Notice/Consent

JAWSDB LLC collects data to operate effectively and provide better quality experiences. Below, you will find a list of our products, services, and processes that gather personal data, our purpose and legal basis for processing that information, who we share that information with, and how long we hold that information.

How JAWSDB LLC uses Personal Data:

Product, Service, or Process

Description of Product, Service, or Process	The process is a resource provisioning flow that delivers access to a SQL database hosted in the cloud.
Category of Personal Data	Social and contact information.
Category of Data Subjects	The organization's provisioning process may briefly handle the email address associated with the account on the marketplace or platform through which the cloud resource is acquired.
Purpose of Processing	The organization is using the personal information to send a generic "Welcome" email to the platform account or marketplace account acquiring the cloud resource.
Legal Basis for Processing	The organization has a legitimate business interest in handling the information.
Automated Processing or Profiling	Automated processing occurs.
If Automated Processing is Used, Methods and Logic	The automated system queries the user's account email address from the marketplace or platform at the completion of the provisioning process. Once the email address is acquired, a "Welcome" email to that address is scheduled with a third-party email-distribution processor. This processor checks the address against their securely maintained opt-out list before sending.

Decisions with a Legal Effect that Use Automated Processing	No decisions based on this data is made beyond the scheduling of the "Welcome" email.
Categories of Recipients who Receive this Personal Data	SendGrid: SendGrid is the processor used by JAWSDB LLC to deliver the generic "Welcome" email to users and to maintain the opt-out list for email communication.

Product, Service, or Process

Description of Product, Service, or Process	The service is a simplified query-interface for submitting read-only queries to a user's SQL database and displaying results.
Category of Personal Data	Identifying information. Opinions, beliefs, personal preferences. Physical characteristics. Personal history data. Social and contact information. Financial data. Tracking data.
Category of Data Subjects	The organization's query-interface, "Databites", handles user-crafted SQL queries which may potentially contain personal information. The data returned from a query may also contain personal information.
Purpose of Processing	"Databites" is a service feature to provide quick, easy querying of one's AWS-managed database. The ability of a user to run custom queries against their database is an improvement to the user experience.
Legal Basis for Processing	The organization has a legitimate business interest in handling the information.
Automated Processing or Profiling	Automated processing does not occur.
If Automated Processing is Used, Methods and Logic	
Decisions with a Legal Effect that Use Automated Processing	
Categories of Recipients who Receive this Personal Data	Amazon Web Services: Amazon Web Services provides the servers that host the organization's web application. The "Databites" feature is hosted within the web application.
